

Performance

**Bravissimo™**

1. High performance **digital processing** ensures consistent high performance
2. **3 channels** enable adjustment to suit client's hearing loss
3. Fixed **directional microphones** reduce noise interference from behind
4. **Wide Dynamic Range Compression** makes sounds clearer and more comfortable
5. **Feedback management** and microphone noise reduction processes reduces whistling
6. **Sound Stabiliser** helps deliver audibility and natural sound quality
7. **3 programmes** for T-Coil, microphone or T-Coil and microphone, to suit your lifestyle
8. **Paediatric fitting options** to perfectly fit children. BTEs are available in a choice of 6 colours
9. **Long battery life** of over 200 hours

widex **real™**  
zoom in on life

1. Unique **ISP** technology means all processes function optimally to best suit client's needs
2. **3 Channel** adjustment to client's hearing loss
3. **Locator** adaptive directional microphone system works to minimise noise interference
4. **Dynamic Integrator** controls all processing according to clients' preferences
5. **Feedback Cancelling** reduces feedback and cuts painful whistling
6. **Enhanced Dynamic Range Compression** makes sounds easier to hear - soft sounds are audible and loud sounds remain comfortable
7. Up to **3 Customised Listening Programs**: 1 master acoustic, & up to 2 personal acoustic or T-coil
8. **Sensogram** ensures an accurate, personalised fitting in all bands, precisely taking account of loss, earmould and ear acoustics

widex **Flash™**  
easy listening

1. Unique **ISP** technology means all processes function optimally to best suit client's needs
2. **5 Channel** adjustment to client's hearing loss
3. **Flash Locator** adaptive directional microphone system works to minimise noise interference
4. **Dynamic Integrator** controls all processing according to clients' preferences
5. **Feedback Cancelling** reduces feedback and cuts painful whistling
6. Widex's proven **Speech Intensification System** improves speech intelligibility in noise
7. Long-term **data logging** enables better fitting
8. **Enhanced Dynamic Range Compression** makes sounds easier to hear - soft sounds are audible and loud sounds remain comfortable
9. Up to **4 Customised Listening Programs**: 1 master, 1 personal and 2 T-coil
10. **Sensogram** ensures an accurate, personalised fitting in all bands, precisely taking account of loss, earmould and ear acoustics

widex **AIKIA™**

1. Unique **ISP** technology means all processes function optimally to best suit client's needs
2. **10 channels** are concentrated in speech frequencies, maximising adjustability for speech in noise
3. **AIKIA Locator** adaptive directional microphone system works in 10 bands, isolating speech and improving speech in noise
4. **Dynamic Integrator** controls all processing according to clients' preferences
5. **Multi-Directional Active Feedback Cancelling** minimises feedback and eliminates whistling
6. Widex's proven **Speech Intensification System** improves speech intelligibility in noise
7. **Sound Diary** logs problem sounds as they occur, improving fitting
8. **Enhanced Dynamic Range Compression** makes sounds easier to hear - soft sounds are audible and loud sounds remain comfortable
9. Up to **4 Customised Listening Programs**: 1 master acoustic, 1 personal acoustic & 2 T-coil (AIKIA) or 1 master acoustic & 1 personal acoustic (PA-110)
10. **EcoTech II** hibernates processors until use, extending battery life
11. **Sensogram** ensures an accurate, personalised fitting in all bands, precisely taking account of loss, earmould and ear acoustics
12. **RC3** remote control simply switches programs and enables easy data logging

Fitting Flexibility

widex passion™  
DEDICATION TO DETAIL  
PA 110

widex **Inteo™**

1. Unique **ISP** technology means all processes function optimally to best suit client's needs
2. With **15 Channels**, Inteo is highly adjustable to suit client's losses
3. **High Definition Locator (HDL)** adaptive directional microphone system works in 15 bands - identifying and eliminating unwanted noise, but keeping speech
4. **Dynamic Integrator** controls all processing according to client's preferences
5. **Multi-Directional Active Feedback Cancelling** predicts and eliminates feedback, permitting higher gain, larger vents and improving comfort as well as stopping whistling
6. **Speech Enhancer** is the ultimate speech processing algorithm, using **Speech Intelligibility Index (SII)** to give unrivalled speech clarity
7. **Audibility Extender (AE)** frequency transposition restores the ability to hear and appreciate high pitched sounds, music and bird songs
8. **Sound Diary** logs problem sounds as they occur, improving fitting
9. **Speech & Noise Tracer** monitors the signal-to noise ratio & separates speech from noise
10. **Enhanced Dynamic Range Compression (EDRC)** in 15 channels makes sounds easier to hear - soft sounds are audible and loud sounds remain comfortable
11. Up to **5 Customised Listening Programs**: 1 master acoustic, 2 personal acoustic & 2 T-coil (Inteo) or 1 master acoustic & 2 personal acoustic (PA-115)
12. **EcoTech II** hibernates processors until use, extending battery life
13. **Sensogram** and **Expanded Sensogram** in 15 bands ensures an accurate, personalised fitting in all bands, precisely taking account of loss, earmould and ear acoustics
14. **RC3** remote control simply switches programs & enables easy data logging

widex **mind<sup>330</sup>**  
the pleasure of hearing

1. Latest generation **DUAL ISP** technology means all processes function optimally to best suit client's needs
2. **TruSound** compression gives noticeably better and more natural sound without distortion right to the fitting limit - soft sounds are audible and loud sounds remain comfortable
3. **Awareness Layer** enhances usability and comfort
4. **SmartSpeak** uses recorded voices to indicate instrument status and battery life
5. **ClearBand** 2-way receivers use Hi-Fi inspired technology to ensure better, truer music & sound - even over 10kHz
6. **10 channels** are highly adjustable and optimised for better speech intelligibility
7. **High Definition Locator (HDL)** adaptive directional microphone system works in 10 bands - identifying and eliminating unwanted noise, but keeping speech
8. **Dynamic Integrator** controls all processing according to client's preferences
9. **Multi-Directional Active Feedback Cancelling** predicts and eliminates feedback, permitting higher gain, larger vents and improving comfort as well as stopping whistling
10. **Audibility Extender (AE)** frequency transposition restores the ability to hear and appreciate high pitched sounds, music and bird songs
11. **Speech & Noise Tracer** monitors the signal-to noise ratio & separates speech from noise
12. **Sound Diary** logs problem sounds as they occur, improving fitting
13. Up to **4 Customised Listening Programs**: 1 master acoustic & up to 3 personal acoustic/ T-coil
14. **EcoTech II** hibernates processors until use, extending battery life
15. **Sensogram** and **Expanded Sensogram** in 15 bands ensures an accurate, personalised fitting in all bands, precisely taking account of loss, earmould and ear acoustics
16. **RC4 remote control** simply switches programs, operates Zen features & enables easy data logging

1. Latest generation **DUAL ISP** technology means all processes function optimally to best suit client's needs
2. **TruSound** compression gives noticeably better and more natural sound without distortion right to the fitting limit - soft sounds are audible and loud sounds remain comfortable
3. **Awareness Layer** gives holistically usable performance
4. **Uniqe Zen** programme assists relaxation, reduces stress and can help concentration
5. **SmartSpeak** uses recorded voices to indicate instrument status & battery life
6. **ClearBand** 2-way receivers use Hi-Fi inspired technology to ensure better, truer music & sound - even over 10kHz
7. With **15 channels**, Mind440 is highly adjustable to suit client's losses
8. **High Definition Locator (HDL)** adaptive directional microphone system works in 15 bands - identifying and eliminating unwanted noise, but keeping speech
9. **Dynamic Integrator** controls all processing according to clients' preferences
10. **Multi-Directional Active Feedback Cancelling** predicts and eliminates feedback, permitting higher gain, larger vents and improving comfort as well as stopping whistling
11. **Speech Enhancer** is the ultimate speech processing algorithm, using **Speech Intelligibility Index (SII)** to give unrivalled speech clarity
12. **Audibility Extender (AE)** frequency transposition restores the ability to hear and appreciate high pitched sounds, music and bird songs
13. **Sound Diary** logs problem sounds as they occur, improving fitting
14. **Speech & Noise Tracer** monitors the signal-to noise ratio & separates speech from noise
15. Up to **8 Customised Listening Programs**: 1 master acoustic & up to 4 personal acoustic/ T-coil with 3 further Zen programs
16. **EcoTech II** hibernates processors until use, extending battery life
17. **Sensogram** and **Expanded Sensogram** in 15 bands ensures an accurate, personalised fitting in all bands, precisely taking account of loss, earmould and ear acoustics
18. **RC4 remote control** simply switches programs, operates Zen features & enables easy data logging
